Manufacturer Partners

Our partners are experienced EVSE providers and technology leaders. We are proud to represent the following manufacturers.

ADS-TEC

ADS-TECS battery-buffered ultra-fast charging solutions for electromobility with up to 320kW charging power. This enables charging within minutes where the grid performance is too low for fast charging.

ATOM POWER

Powered by solid-state circuit breakers, Atom Power centralizes and distributes energy in a safe, scalable manner. FedRAMP and BABA approved, ideal for meeting MA and other building code requirements.

AUTEL ENERGY

Established in 2004, Autel quickly became one of the world's leading providers of intelligent automotive products and services. Autel Energy offers EVSE solutions from Level 2 - high power DCFC.

BREEZEV

BreezEV, a business unit of Light Efficient Design offers residential and commercial Level 2 EVSE. Supported locally and in-stock at most electrical distributors. BABA options, mostly made in MA.

RED E CHARGE

RED E is our primary supplier for AUTEL, factory pre-commissioned with RED E cloud. Access all the features that support a charger network with no out of pocket up front or annual costs to the host. RED E and AUTEL are now on all QPL's and are a qualified Ford Elite supplier.

XCHARGE

With over 40,000 chargers installed across the world, XCHARGE offers a family of DCFC including 208V and NETZERO Series - a single unit high power charger equipped with a 19-inch touchscreen and a Liquid cooled Lithium-ion battery packs. With up to 210kW output power, it supports for 2 vehicles simultaneously charging.
